

Traffic Advisory: Lane Shift on Tassajara Road near Fallon Road Beginning July 16

Local residents who travel on Tassajara Road south of Fallon Road should be advised of an upcoming traffic lane shift and a speed limit reduction between Silvera Ranch Road and Fallon Road due to road widening. Work will begin on July 16.

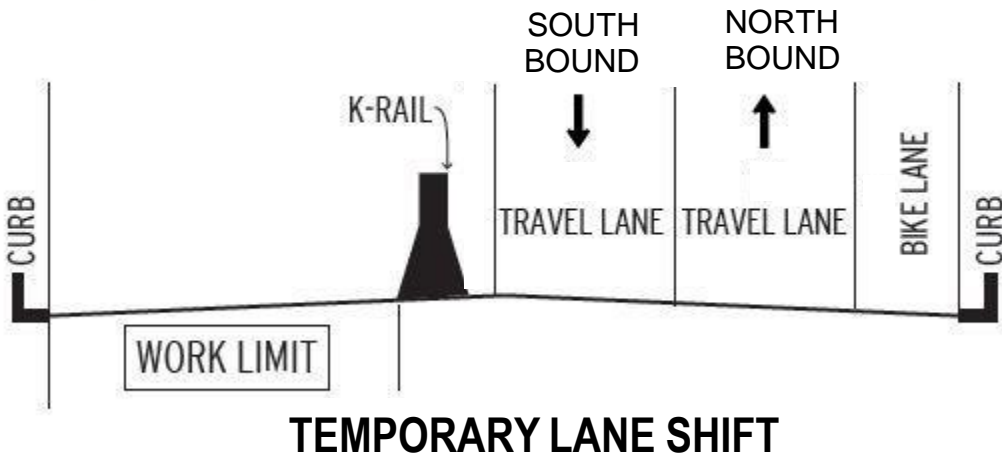

The existing northbound and southbound lanes will be shifted to the eastern half of the roadway pavement. Also, for increased safety, the speed limit on Tassajara Road will be temporarily reduced to 35 miles per hour in the construction zone.

In order to install a barrier, this segment of roadway will be temporarily reduced to a single lane of traffic on Saturday, July 16, between the hours of 9:00 a.m. and 3:30 p.m. Flaggers will be stationed at both Silvera Ranch Drive and Fallon Road to direct and manage the flow of traffic. This work is scheduled to begin after the morning peak commute period. Both northbound and southbound traffic lanes are expected to reopen prior to the peak afternoon commute.

The cross section below illustrates the existing lane configuration on Tassajara Road (looking northbound). There is currently one lane in each direction on Tassajara Road separated by a painted median.

The following cross section illustrates what the new temporary lane shift on Tassajara Road will look like (again, looking northbound) after July 16. Travel lanes will be shifted east and the existing painted median will be removed to provide room for concrete barriers (K-rail) to separate public traffic from construction activities.

Based on the construction schedule, it is anticipated that lanes on Tassajara Road will remain in this configuration for approximately four weeks. We apologize for the inconvenience as we work to improve the quality and safety of our roads.
